

PERFORMANCE SHAGYA-ARABIAN REGISTRY

SPRING 2021

September Photo Contest
Heirtothe Backwoods Picture by Coleen Scott

2021 IS OFF TO A GOOD START AND WE HOPE ALL OF YOU ARE OUT THERE RIDING AND ENJOYING YOUR SHAGYA-ARABIANS.

2020 WAS A DIFFERENT YEAR FOR SHAGYA – ARABIAN HORSE ENTHUSIASTS. ALL OF THE UNCERTAINTY, WILL THIS EVENT GET TO GO, WILL THAT RIDE HAPPEN? IN ADDITION TO OUR REGULAR AWARDS THE BOARD PUT ON SOME ONLINE EVENTS AND WE APPRECIATE EVERYONE THAT PARTICIPATED. LOOK FOR MORE EVENTS AND ACTIVITIES HAPPENING SOON.

2021 BOARD OF DIRECTORS ELECTIONS.

Do you or someone you know have an interest in serving on the PShR board of directors? Meetings are held monthly by phone. Duties include; serving on committees, planning events, and promoting Shagya-Arabians.

Please send Holly an email stating your desire to serve and a short bio to thebackwoodsranh@gmail.com by March 12th.

2021 ANNUAL MEMBERSHIP MEETING

The 2021 Annual meeting will be held on April 7th at 7pm central time. Everyone is encouraged to call in.

Dial-in Number: (515) 604-9094

Access code: 320-255-780#

International dial-in: <https://fccdl.in/i/329-255-780>

Online meeting ID 329-255-780

Join the online meeting: <https://join.freeconferencecall.com/329-255-780>

Victory's Story

Terri & Tom Appleton
WineGlass Victory
Merlin, Oregon

It all started out with a message from my sister-in-law who was aware my husband's horse just passed away a few months ago. She had a friend who was looking for a great home for a wonderful horse. Off we went to meet this horse.

Rachel, whom owned Victory was such a great lady in telling us about her time with him and what they did together, riding in Competition Endurance and in dressage for many years. She rode and showed us what he was capable of and told of his limitation due to surgery on his front leg. Vic was meant for a beginner or light duty use as he was so well trained and gentle she wanted someone to love and care for him as she has done. She gave us a book of accomplishment and his name plaque and asked us to give him a forever home.

We now own Wineglass Victory a beautiful big gray Shagya.

A breed we had never heard of and one I could hardly pronounce.

We got him home and introduced him to our 4 year old Pinto/Paint Mojo and they were friends at first sight. So far so good. A buddy he very much needed.

That night I looked up the breed and read all about them and the history, so very interesting what they are bred and used for. So much more to learn.

My husband Tom had rode competition trail on a lovely little Peruvian. They were both a match made in heaven, one of those once in a lifetime horses. They did wonderful together. For a person who did not ride a lot to a competition rider said volumes for them. A lot of rides and peaceful times they had together.

Our plan for Victory was a replacement trail horse, he is trained well, very behaved, lots of riding time and also been in lots of competitions. Seemed like a great horse for our needs.

Since Tom has been diagnosed with Parkinson's for about 3 years, riding is a great way to keep him fit and enjoying life outdoors, Vic was a sure mount.

Upon bring Victory home we both rode him knew he was a much taller horse than what we were used to 14 to 15.2 hands. A big difference in everything with a taller horse.

We got him home and realized we did not have a mounting step to get in the saddle. We are both short older people, so jumping up was not an option. Off to build one. Victory has been rode all his life in an English saddle, and we do not own an English saddle. Rachel did say he will adjust to western given a little time. We rode him in western with no problem since he is so eager to please but he was still a little unsure of this new feel. We continued to ride all summer but came to the conclusion a trail horse that he was would not be for Tom. He would need to mount and dismount out on the trails too much and he could not do this on Victory being so tall and Tom not having enough strength to pull himself up to mount. Me, still working full time did not have a lot of time to do trail riding thus we decided to use Victory as our arena horse and let him retire from riding and do other things to keep his mind going. We set up obstacles and worked him in-hand, something he is very good at. We are Clicker training also and progressing to liberty. Since the breed is so versatile, there are endless

ways to work with them. Tom is able to handle with him with ease. Horses have a way in knowing when someone has a disability. Vic is very calm and kind when Tom works with him, a trusted friend, so Victory still worked out for us just in a different way.

Having now owned Victory for 2 and a half years we love him and his funny little ways. We will keep him till his dying days here with us as. He has his forever home.

Having fun with your Shagya horse or any other breed is all that counts, being one with them is just not for riding. Being on the ground mucking stalls being able to watch the beauty they possess makes such a job not so bad. Grooming and feeling the coat in the different seasons is such a joy, many a thing that many non-horse owners will never know. Having the morning whinny "Hello" accompanied with a soft muzzle kiss is the best to get your day off to a fantastic start.

The evening chores are always a surprise when they want to help like knocking over the wheelbarrow, pulling and standing on hoses, head butting you while you are bent over all things that make you laugh after the initial upset.

If you ask Victory, he would tell you his retirement years are the best and would not have it any other way... well maybe more treats.

The Indomitable Shagya

By Linda Rudolphi

The Shagya-Arabian horse has the ability to inspire a passion within all they meet. The ShA combines strength and beauty; stamina and elegance; dedication and grace. Throughout history the ShA has served mankind in war, pageantry, competition and family companionship.

In a never ending study of the intriguing history of the ShA, I have compiled an importation timeline of Shagya-Arabian horses to the US and Canada. I searched numerous databases and articles to pull together information. In documents a horse name is easily changed with a mere number typo; within the Senate Hearings in 1947 the list of horses does not even agree. I researched horses to the best of my ability and tried to make some educated guesses of the correct horse identification. I have referenced my research although footnotes have been eliminated on the chart due to the size for this newsletter. Any additional information anyone would want to share would be appreciated. It is a bittersweet review when we look at all the valuable bloodlines that were not perpetuated on this continent.

The importations arousing the most intrigue are the first documented and largest group of the Shagya-Arabian and other Hungarian horses imported by the US Remount in 1945 & 1946. Stories abound of people who fled the invasion of armies by packing their family and a few possessions to flee at the end of WW II. Among those prized possession were their Hungarian horses. In the 1947 Senate Hearing, the Subcommittee of the Armed Services discussed the future of the 150 horses brought to the US. Of the 150 it was determined a total of 105 were Hungarian horses (77 in the 1945 and 28 in the 1946 shipments). Col Hamilton testified the following:

"We visited government breeding farms and privately owned horse farms thought the Seventh Army area and then went to the Third Army area in Bavaria. It is there that the story of these Hungarian horses starts. The main Third Army horse installation was at Donauworth; near the town of Bergstetten in Bavaria.....

Major Owens was operating as a normal Army remount depot, issuing and receiving horses from any and all categories to our troops as they needed them.....

For help, Major Owens had a group of Hungarian officers and men, still in the uniform of the Hungarian Army that had been captured when the depot was captured by the Third Army along with the depot and horses.....

Nedda IDA Imported by Dennis and Irmí Atam

**Karol du Cavallon
Imported by Shannon McCracken**

Among the military personnel was a Col Parvey, a Hungarian, who for more than 20 years had been in charge of the breeding operations of the Hungarian Government at the old established breeding farm in Kisber...

He had the farm breeding records on the horses and had an intimate knowledge of all these Hungarian horses. ...

At no time was there any indication from Col Parvey to us that any of these Hungarian horses had been removed from Hungary to Germany under duress or compulsion of the Germans; rather, it was generally discussed and understood throughout my several days there that these horses, along with other military supplies and equipment, had been evacuated by the Germans and Hungarian Armies to avoid the Russian advance into Hungary...

The half-breeds brought over that were bred by the Hungarian Government, after many generations of selective breeding, were, in my opinion, outstanding from the standpoint of horses for military use."

Imagine being a POW trying to survive and yet you are dedicated to the care and identification of the horses also being interned. Imagine the cognitive whereabouts to grab the farm breeding records for these horses while fleeing for your life. The 1947 Senate Hearing was tasked with the return of the horses as part of reparations to the Hungarian government. A tentative date was even established and communication with the Hungarian Agriculture Ministry had verified the identification of the horses. However, in the praise of the animals by Hamilton an unforeseen fact became aware:

"I talked to German officers of the Air Corps and of the Ground Forces and the mechanized outfits and cavalry outfits and almost to a man it was their opinion that they lost the war on the eastern front because the Russians had better horses. Their horses were better and the German motor and mechanized outfits were helpless in the roadless stretches of Russia. To a man they were all of the opinion the one of the major reasons for losing the war on the Russian front was the superb cavalry of the Russians..."

The horses providing this indomitable force were the Hungarian horses. This changed the classification of the horses to instruments of war and stopped their return to Hungary. In my opinion, this was a sad turn of event for the horses. At this time the US Remount knew they would be phasing out the Remount horses therefore the improvement of the army horses with the use of the Hungarian horses would not come to fruition. By not returning the horses to Hungary, the rebuilding of breeding stock was hampered. The breeds in Hungary had to essentially rebuild with the remaining horses scattered across the European continent. Either scenario to me was a sad waste of indomitable horses.

Fortunately the spirit of the Hungarian people enabled the importation of Hungarian horses to become influential in the US to a small degree. The Countess Margit Besseney, familiar with the ShA, did purchase a couple of ShA horses at the Ft Reno sale. Besseney

Murad Imported by Anke Brander

Budapest bred by Ulla Nyegaard

KS tribute Imported by Donna Coss

purchased the mare *52 Gazal II the dam of stallion H. Bravo, a son of the Arabian stallion *Pilot who was also in the imports. The Hungarian refugee Countess Judith Gyurky managed to bring a few Hungarian horses to the US. Within the Gyurky horses the stallion *Sobri, carried the Shagya sire-line and was the great-grandson of Shagya XVII-3. *Sobri sired the stallion M. Sobricska who went on to be an influential and foundation stallion for the Hungarian Horse Association of America. To exemplify the passion of the Hungarian horse people, Countess Gyurky insisted her horses to be designated with the capital letter "M" for Magyar. Within the HHAA registry the Felver horses were designated with a capital "H", for Hungarian.

As Europeans arrived to the US after the war they again included the ShA in their prized possessions. Dr. Vas brought his personal riding horse *Shagya XLII-1. Dr. Leslie Koszely brought his driving ShA mares. Hans and Leni Walter brought breeding stock with them from Switzerland.

The importations on record with an influence on new breeding stock continued. In 1986 A. Furby, with the help of Robert Shuping, brought 2 ShA stallions, 1 ShA stallion in-utero, and 3 ShA mares to the US. Combined with the horses of Countess Besseney, Hans and Leni Walter and the Koszely mares a foundation for ShA breeding started in the US. Some of the largest groups during the 1990's include the Swiss family of Urs and Peter Stelli. The Stelli's brought the influential stallion *Amurath Samurai to Canada. Samurai left behind a couple of sons who have gone on to contribute to the ShA in North America. In addition, the Stelli's also imported 2 ShA mares. David Bulechek along with Ron & Pat Pettitt imported a pregnant ShA mare.

The early years of the 21st century brought in another significant influx of imported ShA bloodstock. In 2001 Donna Coss imported 3 ShA stallions from Germany. Denis and Irmi Atam brought their personal riding horses and breeding stock from Germany. Anke Querbach Brander brought the High Point performance ShA stallion *Murad along with 3 broodmares from Germany. Three Oaks Farm imported 3 ShA mares and a ShA gelding from Babolna. John Sitter imported 3 ShA mares, one mare with lovely Kabiuk bloodlines. In addition Sitter imported inutero the stallion *Hadban USA. Shannon McCracken imported two ShA stallions to Canada, one being *Karol du Cavallon with French bloodlines.

A lesson learned during the war in particular, without the sophisticated Hungarian branding system it can be assumed most of the horses rescued during the chaos of war would have been lost. While today many do not use this identification system in general, the State Studs still do, it is important to have your horse registered with good identification

records and DNA on file. Without the farm records carried by the Hungarian Kisber Stud Manager and without the cooperation of the Hungarian Agriculture Ministry that housed the registration certificates - horses could not have been identified. Make sure you have a copy of your DNA reports in your files. Photos highlighting markings and other permanent marks are still important today to identify horses sold without registration papers.

The Shagya-Arabian horses in the US and Canada are still dependent on the importation of a variety of bloodlines. The importation of frozen semen doses is being implemented by some breeders. Demographics show us the equestrian community is changing with fewer and fewer people breeding and raising young horses throughout all breeds. An increasing population of owners own only one horse and board their horse to ride on week-ends. Somehow we have to figure out how to keep producing the ShA to provide these riding horses. During the 1980's and 1990's the population of the ShA exploded in numbers with 3 ShA stallions alone producing 300 foals. Can we get back to those numbers? Yes, without a doubt. **Remember the Shagya-Arabian is indomitable.**

HS Wineglass Pik George – 2nd Level USDF All Breeds Award Winner By Nicole Mauser-Storer

If you've read my prior stories on HS WineGlass Pik George and his accomplishments, you'll remember that my initial plan was to have a versatile horse I enjoyed spending time with. I did not have any lofty goals to speak of. As I learned more about the Book system in PShR and the importance of performance testing even for geldings, I worked to get George through the requirements to be a Book 1 horse. In doing that, we won the All Breeds award at 1st Level in USDF and completed 1000 miles in Endurance competition.

Learning is addictive as is quality time with a horse you enjoy, so George and I continued working to improve our dressage skills.

As 2020 and the COVID-19 situation caused the cancellation of many shows and events for the first part of the season, I had put all goals aside and was thankful for the ability to continue taking lessons and enjoying my time.

It became clear midway through the season that we were probably not going to log any endurance miles in competition, and I realized that there were just enough options left in USDF shows that we could meet the requirements for the USDF All Breeds award at 2nd Level. We ramped up our training with an emphasis on being show ready and off we went. There were a couple of bumps in the road, but George turned in some really nice 2nd level tests and we were able to earn the All Breeds Award in 2020 for 2nd Level. Now we are spending the winter working to see if 3rd level is something we can do well in a show and we will see what happens next!

**AUGUST PHOTO CONTEST WINNER
Gretta by Tera McCool**

CS Ostentatious+ By Kayla Smith

When 2020 started I knew it was going to be a bit different, I was going to dedicate my time and training into CS Ostentatious+, my Half-Arabian/Shagya gelding. What I didn't expect was the twists and turns that the year eventually gave into.

My journey with Austin this year began February when I attended a clinic nearby with former Canadian Olympian, Cindy Ishoy. From there I began to more confident and started the serious planning for show season. Our first rated show was scheduled for March, but when the COVID pandemic flared up, the shows starting to cancel like wildfire.

It wasn't until the end of June that my show schedule started to take place. It was a very tough season to try and find shows nearby that was beneficial to my goals. I had 3 shows I crammed in to attain the needed scores for USDF All-Breed Awards for both Training and First level. Also in that short about of time we gained enough points for Austin's AHA Achievement Award of Legion of Honor (+). I was pretty pleased I was able to get two of my three main goals accomplished in just a short period of time.

What I didn't plan on doing this year, however, was earning qualifying scores to attend USDF Region 4 Championships. It was definitely a learning experience, I had some of the top horses and riders to compete against, and even though we did not place, it was still such an honor to be in the same playing field as others.

I am unsure what 2021 will bring, if I am able to show, at all, with Austin, my main attempt will be to earn the remaining points needed for his Legion of Supreme Honor (+/) through the Arabian Horse Association.

*Thassia				Bahadur, 1991, ShA, black	mare	2003	Kohn, DE	2009	Elaine Kerrigan?		Exact importation date unknown.	7 foals in US per Swiss Data	11/16
	*Ft Reno Sale Catalog - I do not have the complete catalog. The dispersal of the Agriculture Remount Service was held at public auction on November 22, 1948 in Fort Reno, OK.												
	*Both columns designating "Hearing" and "State" are in the same minutes of the Subcommittee of the Committee on Armed Services, United States Senate Dec, 1947. The committee was to answer the "Question of Ownership of Captured Horses". This designation is provided to exemplify the difference of horse names within the same committee, making accurate research difficult. <u>Hearing</u> designates the list compiled by the Army. <u>State</u> designates the list compiled by the Hungarian State.												
	*Year imported - The Government had 2 shipments of horses into the US. Approximately 77 Hungarian horses in 1945 and approximately 28 Hungarian horses in 1946. This totals 105 Hungarian horses out of the estimated 150 total horses imported.												
	*In documents the term "Hungarian Horses" refers to various breeds of Hungarian horses. The largest percentage were probably the Kisber and Babolna State Stud horses.
